

## About Us

**The Orphan Trust seeks to assist the most underprivileged, marginalised and vulnerable members of our society. We aim to help and educate orphaned and homeless children in Bangladesh, one of the poorest countries in the world.**

**We work with existing orphanages, care and education centres in need of funds and assistance to enable them to continue the vital care they provide. We ensure the money goes directly to the orphanages and care centres and that it directly benefits the children.**

The idea for the Orphan trust was born from a desire to have a direct and tangible impact on the lives of innocent voiceless children, who are often victims of poverty, corruption and crime. Somehow writing cheques to large charity organisations was not helping the conscience. Where does the money actually go and exactly how much of each pound gets to the child you have in mind when writing a cheque?

The solution was to make actual contact with the care centres, orphanages and homes that need the help and then support them directly. We can then see improvements the donations make and track how the funds are spent.
